

January 29, 2024

WASHINGTON, DC – ViiNetwork Inc., dba (“ViiMed”), an innovative provider of healthcare information technology solutions, is excited to announce that the ViiMed Care Delivery Platform now contains the ability to integrate with Webex. Webex by Cisco is a leader in cloud-based collaboration and customer experience platforms, offering calling, meetings, events, webinars, polling, and more. Moreover, the ViiMed platform is available in the Webex App Hub at <https://apphub.webex.com/applications/viimed-care-delivery-platform-viimed>.

This collaboration will further help redefine healthcare delivery by automating clinical and operational burdens, providing clinical decision support to enable data-driven care decisions, and delivering continuous care anywhere including within disconnected, intermittent, and low-bandwidth environments.

The healthcare landscape is constantly evolving with the need to provide high-quality, personalized care never greater. Patients want personalization, convenience, and accessible care to meet them where they are, while healthcare providers are tasked to do more with fewer resources in the wake of workforce challenges, regulatory pressures, cyber-attacks, rising inflation and the potential for an economic downturn. These difficult circumstances also present an incredible opportunity as the need for secure, efficient, data-driven and always available care delivery solutions has never been greater.

ViiMed’s ability to integrate with Webex by Cisco aims to address these needs by leveraging ViiMed’s fit-for-purpose no-code care delivery platform and Webex by Cisco, a leader in collaborative meetings, to deliver care anywhere & enable remote collaboration between healthcare professionals.

Key benefits of this partnership include:

- 1) Care Delivery at the Edge, Anywhere
- 2) Improved Provider Experiences
- 3) Heightened Compliance & Cybersecurity
- 4) Data-Driven Decisions / Evidence-Based Care
- 5) Fully Interoperable
- 6) Emerging Response
- 7) Scalability & Accessibility
- 8) Lowers Risk, Drives Cost Efficiency
